

Live Share - VS Code

GW CS 2541W

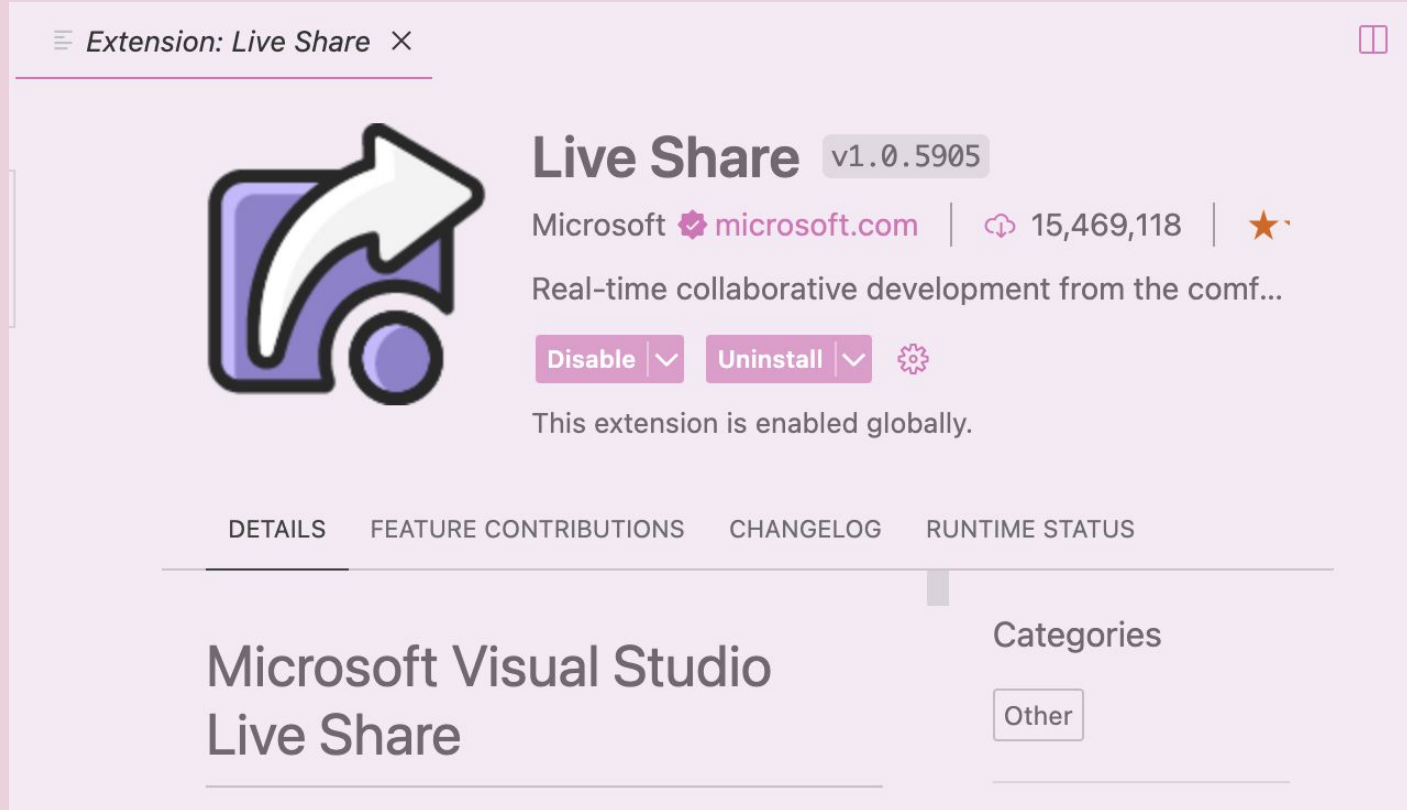

Step 1

1. Go to the extension located at the side
2. Search for “live share”

Step 2

- Install the Live Share if not already installed
- Make sure that you are installing the Microsoft Live Share

The screenshot shows the Visual Studio extension marketplace interface for the 'Live Share' extension. At the top, there is a breadcrumb 'Extension: Live Share' with a close icon. The extension's icon, a purple square with a white arrow pointing up and right, is on the left. To the right, the extension name 'Live Share' is displayed in large black text, followed by the version 'v1.0.5905'. Below this, the publisher 'Microsoft' is listed with a link to 'microsoft.com', the number of downloads '15,469,118', and a star rating. A description reads 'Real-time collaborative development from the conf...'. Action buttons for 'Disable', 'Uninstall', and a settings gear are visible. A status message states 'This extension is enabled globally.' Below the main content, there are tabs for 'DETAILS', 'FEATURE CONTRIBUTIONS', 'CHANGELOG', and 'RUNTIME STATUS'. The 'DETAILS' tab is selected. At the bottom, the text 'Microsoft Visual Studio Live Share' is shown, and a 'Categories' section contains a button labeled 'Other'.
